

ROLLSTAND BRUSH CHANNELS & HOLDERS

Brush blocks must be sized to fit snugly into the inside width of the aluminum brush channel. The large block is generally used for corrugated rolls; the small block for smooth rolls.

Constant and consistent brush pressure can be maintained by adjusting each individual thumb screw. Channels are stocked in 1000mm (39.4") and 1250mm (49.2") lengths and can easily be trimmed as necessary to fit shorter spans. Lengths up to 1300mm (51") are available through special order.
